

# LATERAL POLE SETTER BAT 3300 L

Universal pole setter machine for right-side flanging on standard holes. For use with crawler tractors. Equipped with:

- Hook for removing old poles
- Height-adjustable pole support for adjusting piston stroke to pole height
- 4-lever 45 liters distributor powered by tractor's quick couplings
- 4 hydraulic movements for: 115 cm-stroke pole driver; lateral tilt; lengthwise tilt; 15 cm upper-lateral travel for aligning the head with the pole and for quickly correcting the wrong tractor positioning with respect to the row

# Optional

- CODE 1004 - Hydraulic 3-point control unit WITHOUT OIL including a 45-litre tank, double heat exchanger, multiplier, variable 40 lt/min pump, filter, hoses, priority flow adjustment valve with manual variator, pressure gauge, pair of quick couplings (useful also to apply leaf strippers, polesetters, rotary brushes, augers, rakes for pruning, binders and cutting machines)

- CODE 0813 - Threaded adapter plate to be welded upon tractors which are non predisposed

- CODE 0818 - Connection kit with 8 quick tractor couplings to replace the standard 4-lever 45 L distributor (DEDUCTION)

- CODE 0988 - Electro-hydraulic distributor kit with joystick

- CODE 1365 - Extension for poles up to 5 mt of height (applicable only when ordering)
